

Enterprise Integration Support Guide

Version: 4.2 | **Status:** Approved

Introduction

This document guides developers on connecting to the company's enterprise service bus. All connections must be authenticated via OAuth2. Whitelisting of source IPs is strictly mandatory before accessing the endpoint. If you have any technical problems, please contact the Support Desk.

Security & Authentication

Please follow the OAuth2 workflow using client credentials. Client IDs must be kept confidential and stored securely in environment variables. Access tokens have a lifetime of 3600 seconds.

Human Resources Employee Import Feed Specification

Owner: HR Operations Team | Classification: Restricted PII | Version: 1.1
